
Fingerprints and Ansal Component collaborate on biometric access control for Türkiye

[Fingerprint Cards AB](#) (Fingerprints™) has announced a distribution agreement with [Ansal Component](#), a global provider of component supply services based in Türkiye. The partnership supports and simplifies the region's development of secure devices that integrate advanced fingerprint sensor and software technologies.

“The Turkish market is significant and strategically important. Ansal Component is a great partner to help us grow the reach of our access control solutions in markets where our biometric solutions are known and extremely successful. We're excited to explore new sectors and use cases together, including physical and logical access control, the Internet of Things (IoT) and other innovative new applications,” comments Adam Philpott, CEO of Fingerprints.

Fingerprints' biometric access solution is specifically designed for physical and logical access devices and applications such as smart locks, FIDO tokens, crypto wallets and more. The standalone biometric system hardware, software and algorithm is compact and easy to integrate, minimizing time to market.

Erem Irmak, Managing Director at Ansal Component, concludes: “Our cooperation with Fingerprints will enable Ansal Component to provide innovative solutions to meet our customers' growing security and authentication requirements. We look forward to a successful, long-term relationship.”
